PROFILE

AI Software Engineer with hands-on experience developing and deploying intelligent, production-ready solutions for enterprise platforms.

I build and maintain scalable AI pipelines and full-stack applications with PHP Laravel, React, Vue, Angular and Node.js, using AI-augmented workflows (Claude Code, Cursor) to ship faster without giving up quality.

Day to day that means structuring messy data into queryable systems, wiring CRM automation across HubSpot and Zapier, and working alongside data teams to get AI features into live production — with data privacy and API hygiene taken seriously.

CORE COMPETENCIES

AI & Machine Learning

Claude Code · Cursor · Vibe Coding methodology · Knowledge engineering · AI model pipelines · API integration

Tools & Platforms

HubSpot · Zapier · GitHub · Firebase · Figma · Adobe XD · Elementor · Photoshop / Illustrator

Languages & Frameworks

PHP / Laravel · TypeScript · JavaScript (ES6+) · React.js · Vue.js · Angular · Node.js · HTML5 / CSS3 · MySQL

Ways of working

Cross-functional collaboration · Delivery-focused prioritization · Client-facing communication · Data privacy standards

EXPERIENCE

AI Software Engineer · Callbox Inc.

JUNE 2022 — PRESENT

Enterprise web applications, plus the AI and automation layer that sits on top of them.

- Develop and maintain enterprise-level web applications using PHP Laravel and modern JavaScript frameworks (React.js, Vue.js, Angular).
- Apply AI-augmented development with Cursor, Claude Code and Vibe Coding methodologies to accelerate feature delivery.
- Perform knowledge engineering to structure and manage data intelligently within systems.
- Integrate CRM platforms (HubSpot) via Zapier for workflow automation, custom reporting and business logic.
- Work closely with developers and data teams to integrate AI features into live production systems.
- Contribute to company GitHub repositories, including the Month-to-Date (MTD) Reports system.
- Research and apply new AI tools, frameworks and best practices against real business problems.

Laravel · React · Vue · Angular · HubSpot · Zapier · Claude Code

Web App Developer · Core Global Online Services

OCTOBER 2020 — APRIL 2022

Built a school portal and public site end-to-end for an Iloilo-based Korean educational institute.

- Engineered a full-featured school portal and interactive landing page for an Iloilo-based Korean educational institute.
- Developed dynamic backend services and frontend interfaces with an eye on performance, responsive design and cross-browser compatibility.
- Integrated a secure end-to-end online payment gateway to streamline tuition collection and billing for students and guardians.

PHP · JavaScript · Payments · Responsive UI

Research Developer · WVSU GTBI Research Building

JANUARY 2019 — MARCH 2020

Full-stack systems for university faculty, plus the Arduino hardware that fed them.

- Architected and deployed full-stack web applications and institutional management systems for WVSU faculty and researchers.
- Designed, prototyped and programmed custom Arduino hardware integrated with web dashboards for real-time monitoring and automation.
- Worked directly with university professors to turn research requirements into functional software and embedded prototypes.

Full-stack · Arduino · IoT dashboards · Research

Core HR and attendance systems, from schema design to access control.

- Engineered and maintained core Human Resource and Daily Time Record (DTR) systems using PHP Laravel and JavaScript.
- Designed and optimized MySQL schemas to handle complex attendance tracking, leave requests and records management.
- Implemented role-based authentication and secure backend logic to safeguard sensitive employee HR data.

Laravel · MySQL · RBAC · HR systems

SELECTED PROJECTS

louieDevAgent github.com/louiemarte10/agentic-ai-using-claude-code

A multi-tenant AI dev agent you talk to over Telegram — each tenant gets its own bot, personality, workspace and memory.

TypeScript · Node.js · SQLite · Hono · Grammy · Claude Code

Month-to-Date (MTD) Reports System

A full month-to-date reporting system for the business, maintained across multiple branches with a CI pipeline.

PHP Laravel · JavaScript · MySQL · CI

Mission Control Dashboard louie-agent-dashboard.vercel.app

Real-time monitoring and control for the agent fleet, reachable from any device without server access.

Vue 3 · Tailwind CSS · Vite · Vercel

Brain Hub brain-hub.xyz

Enrollment, payments and billing for a multi-branch review center — a live system carrying 6,000+ student records.

React · Ant Design · Tailwind CSS · Vite · Netlify

EDUCATION

BS Information Technology

PHINMA — University of Iloilo

2014 — 2018

Secondary Education

Iloilo City National High School

2009 — 2014

Elementary Education

Baluarte Elementary School

2003 — 2009

AWARDS & CERTIFICATIONS

2nd Place — Hackathon

PHINMA — University of Iloilo

March 2018

Big Data University Certificate

PHINMA — University of Iloilo

May 2017

NC II — Computer Hardware Servicing

PHINMA — University of Iloilo

April 2015
